

## **Biodata: Helta Anggia & Anita Hobók**

Helta Anggia is a dedicated education professional with extensive experience in language teaching and curriculum development. She holds a degree in English Education and has specialized in enhancing student learning through innovative teaching methods. With a passion for fostering effective communication skills, Helta has been involved in various educational programs and seminars, contributing to the development of language education in Indonesia. Her commitment to continuous improvement and student-centered learning has earned her recognition in the academic community. In addition to her teaching expertise, Helta is known for her collaborative approach and strong leadership in educational initiatives.

Anita Habók is an Associate Professor at the Institute of Education at the University of Szeged, Hungary. She is also a member of the MTA-SZTE Digital Learning Technologies Research Group and the Digital Learning Technologies Incubation Research Group. She earned both her PhD and habilitation in Education from the University of Szeged. Since 2005, she has been teaching a variety of university courses at the BA, MA, and teacher training levels. Her research focuses on learning to learn, self-regulated learning, foreign language learning strategies, vocabulary acquisition, reading strategies and comprehension, and digital literacy.
