Biodata: Maria Georgina Fernandez Sesma, Karla Reyes Arias, & Sofia Amavizca Montaño

Maria Georgina Fernandez Sesma is a professor in the major of English Language Teaching (ELT) at the Sonora State University in Mexico. Doctor of Philosophy in applied linguistics from the University of Southampton (England). She has a master's degree in pedagogy with an emphasis in linguistics from the Autonomous University of Baja California in Mexico. Fernandez is responsible for the Research Group in the major of ELT. She has academic publications on critical thinking development, adult students' oral production, English for specific purposes, and didactic material elaboration. Currently, her research focuses on language learning with technology in the tertiary context.

Karla Reyes Arias is a full-time teacher in a public elementary school in Mexico, where she teaches English as a foreign language. In addition, she works for the National English Program (PRONI). Reyes has an undergraduate degree in English Language Teaching from the Sonora State University in northern Mexico. As a hobby, she studies the German language in the summer courses for adult students at the University of Berlin. Her research focuses on English language teaching and learning with technology. Currently, she investigates the use of podcasts to improve EFL students' pronunciation and vocabulary at the primary school.

Sofia Amavizca Montaño is a Research Professor at the Sonora State University in Mexico. Doctorate in Humanities from the University of Sonora. Master's degree in Education from the University of the Valley of México. Amavizca has participated in social and educational research projects in different educational institutions, and in the design and redesign of subjects related to reading and writing in higher education. She is a member of a consolidated academic body named Innovation and Educational Development, which carries out studies on digital literacy. Founding member of two research networks named Digital Literacy Network and the Latin American Research Network.
